

BUSINESS ANALYST

Medior Level - Amsterdam - 40 hours

Wave5 is a forward-thinking tech startup with offices in Amsterdam and Ho Chi Minh City, Vietnam. We help our customers with digital work, data-driven work and with setting up and supervising tech teams. With our help, the digital transformation is initiated, and they can start working data-driven. We do this by fusing data, AI and software into smart applications.

This is done through projects or with platform teams. To achieve the best results, we use both the latest Microsoft technologies and our own IP.

We carry out our mission based on four important values: growth, craftsmanship, fun and independence. We believe that every employee should have input to maintain those values. That is why you are encouraged to share your ideas and points for improvement as much as possible.

At wave5

you will be working for a modern, cutting-edge organization at the forefront of Microsoft innovation and technologies. We strive for excellence and encourage you to grow along with us, in a business sense, but in a personal sense as well. As Business Analyst you act as specialist for our clients, constantly moving between directors and IT specialists. You are able to understand and explain complex processes, and like to solve potential problems for the customer within as short a time as possible. Throughout our projects you are constantly involved and keeping a finger on the pulse, knowing everyone's role and where we stand. Together with our Solution Architects

you're working to solve bottleneck situations and act as guide during the implementation of our solutions. A problem solving attitude is a must. But that does not mean we expect you to know everything; the professionals at Wave5 can (and will!) help you with your further development. As Business Analyst you make the difference by keeping a clear overview and, above all, anticipate what is happening or is going to happen. Besides the knowledge and skills you already have, Wave5 offers you a lot of room to keep on growing. You will learn from our experts, on the job, and extra training. This way, you will keep on improving, and your knowledge will be continuously sharpened.

What you'll do

- Contact point with business owners
- You translate the wishes of users into 'techie' language
- You are the bridge between users and developers
- You work together with our Solution Architects and developers to come up with logical and understandable solutions

Next steps

- Product Owner
- Solution Architect

What we ask

- Experience with technological processes
- Communicative skills
- You are able to work with users on the work floor, as well as working with C-level directors
- Knowledge and passion for Microsoft products and strategy
- Strong analytical skills
- You are curious and eager to learn
- You love solving problems
- You have ambition to grow

“Be part of a young organisation with a club of driven people and a great place to grow!”

What we offer

- A culture of growth based on safety and trust in which we are constantly learning and researching, and focus on each other's knowledge is emphasized
- Exciting and challenging assignments and projects for which we will use the newest technologies
- A nice salary supplemented with:
- A personal budget that can be used for pension or other matters
- An educational budget that can be used for an education of your choice
- A mobility budget that can be used for a car, bicycle, public transport subscription or a combination of the above
- Laptop and phone
- The freedom to choose from where and how you want to work
- Digital nomads: it is even possible to work from abroad
