DATA ENGINEER

Medior Level - Amsterdam - 40 hours

Wave5 is a forward-thinking tech startup with offices in Amsterdam and Ho Chi Minh City, Vietnam. We help our customers with digital work, data-driven work and with setting up and supervising tech teams. With our help, the digital transformation is initiated, and they can start working data-driven. We do this by fusing data, AI and software into smart applications.

This is done through projects or with platform teams. To achieve the best results, we use both the latest Microsoft technologies and our own IP.

We carry out our mission based on four important values: growth, craftsmanship, fun and independence. We believe that every employee should have input to maintain those values. That is why you are encouraged to share your ideas and points for improvement as much as possible.

At Wave5

you will be working for a modern, cutting-edge organization at the forefront of Microsoft innovation and technologies. We strive for excellence and encourage you to grow along with us, in a business sense, but in a personal sense as well.

As Data Engineer, you will have an important part to play at Wave5. Our clients will need you for the implementation of a successful modern data platform. Your skills and knowledge will be put to good use to work on the success of Wave5 as a modern and future oriented organization. For this, you will use the newest innovations and technologies that the Microsoft Azure Cloud Platform has to offer. At Wave5, you will enjoy a lot of freedom, and responsibility, to use your modeling and analytical skills to make sure our clients are more than satisfied. You will offer our clients an even better solution than they expected. Besides the knowledge and skills you already possess, Wave5 offers you a lot of room to keep on growing. You will learn from our experts, on the job, and extra training. This way, you will keep on improving, and your knowledge will be continuously sharpened.

What we ask

- The drive and curiousity to keep on learning and growing
- A proactive and self-organizing mindset
- You are collegial and work well in teams
- An attitude focused on our clients
- A passion for technology and the development of Data & AI solutions
- Above average interest in and experience with data technologies such as ETL/ELT and data modeling
- Experience with PowerBI
- A proven record of building data scenarios such as datawarehouses and reporting models
- Experienced in the development of SQL queries
- Experience with Azure data services such as Data Factory/Databricks/Datalake/Synapse

wave5

"Be part of a young organisation with a club of driven people and a great place to grow!"

What we offer

- A culture of growth based on safety and trust in which we are constantly learning and researching, and focus on each other's knowledge is emphasized
- Exciting and challenging assignments and projects in which we will use the newest technologies
- A nice salary supplemented with:
- A personal budget that can be used for pension or other matters

- An educational budget that you can use for an education of your choice
- A mobility budget which can be used for a car, bicycle, public transport subscription, or a combination of the above
- Laptop and phone
- Digital nomads: it is even possible to work from abroad

Certifications you will train for:

- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Azure Data Engineer Associate
